About CLF

Carson Leslie Foundation's (CLF) Collaborative Mission: invest in transformative medulloblastoma research, mental health support of kids in the battle, awareness that brain cancer is the deadliest disease of our Nation's children.

Did you know?

- **Brain cancer** is the most common cause of non-accidental death of children in the USA
- **Medulloblastomas** are the **most common** brain cancers in children
- **Medulloblastoma** treatment is highly toxic and can lead to long-term complications including endocrine, heart, neurological, visual, hearing and other serious conditions.

You're invited to help honor Carson's last whispered wish, "make sure they study those tumors in my brain and help the next kid with cancer" – and be a part of finding a cure for medulloblastoma!
